

**Campus Consortium for Environmental Excellence
Technical Program & Quarterly Meeting**

University of Vermont, Davis Center, Burlington, VT

Friday 15 August 2014

10:00 AM to 4:00

Campus EHS professionals are called in to consult on various types of construction, renovation and demolition projects. We are called in at various points in project development from planning, design review, and pre-construction meetings to waste disposal, construction safety to “we just found something you need to look at” and Sustainability. And we all have various levels of experience with construction.

As a group of experienced professionals, we can come up with a common understanding of EHS roles in large construction projects and small lab renovations. We can share our individual tools for managing the EHS responsibilities in projects. We can collaborate to develop new tools to better serve our common needs.

10:00: Welcome and Introductions

UVM’s Experience: Michelle Smith & Francis Churchill, UVM

Design Team’s Expectation: Janet Ross, Ellenzweig Associates

U Mass Lowell Construction, Demolition and Fire Safety: Rich Wood, UML

Lunch

Harvard’s Construction Support Program: Joe Meldrim, Harvard

Presentation of Individual Campus’ tools: **BYOBMP** (Bring your own Best Management Practice): Facilitated by Woodard & Curran

Develop consensus tools (facilitated by Woodard & Curran)

4:00 Adjourn
